# Liquid Gold: California's Water

## **California Education and the Environment Initiative**

Approved by the California State Board of Education, 2010

### **The Education and the Environment Initiative Curriculum is a cooperative endeavor of the following entities:**

California Environmental Protection Agency  
California Natural Resources Agency  
California State Board of Education  
California Department of Education  
Department of Resources Recycling and Recovery (CalRecycle)

### **Key Partners:**

Special thanks to **Heal the Bay**, sponsor of the EEI law, for their partnership and participation in reviewing portions of the EEI curriculum.

Valuable assistance with maps, photos, videos and design was provided by the **National Geographic Society** under a contract with the State of California.

## **Lesson 1    Who's in Charge of the Water?**

None required for this lesson.

## **Lesson 2    Supply and Demand for California's Water**

<b>1</b>	Hydrologic Cycle . . . . .	2
<b>2</b>	Prevailing Wind Currents . . . . .	3
<b>3</b>	California's Hydrologic Regions . . . . .	4

## **Lesson 3    Moving California's Water**

<b>4</b>	The California Aqueduct . . . . .	5
<b>5</b>	State Water Project . . . . .	6
<b>6</b>	Regional Water Transfers . . . . .	7
<b>7</b>	Central Valley Project . . . . .	8
<b>8</b>	Local Water Projects . . . . .	9

## **Lesson 4    Salt and Smelt—Feeling the Effects of California's Thirst**

<b>9</b>	The Delta Smelt and Salty Lands . . . . .	10
----------	---	----

## **Lesson 5    The Watery Decisions We Make**

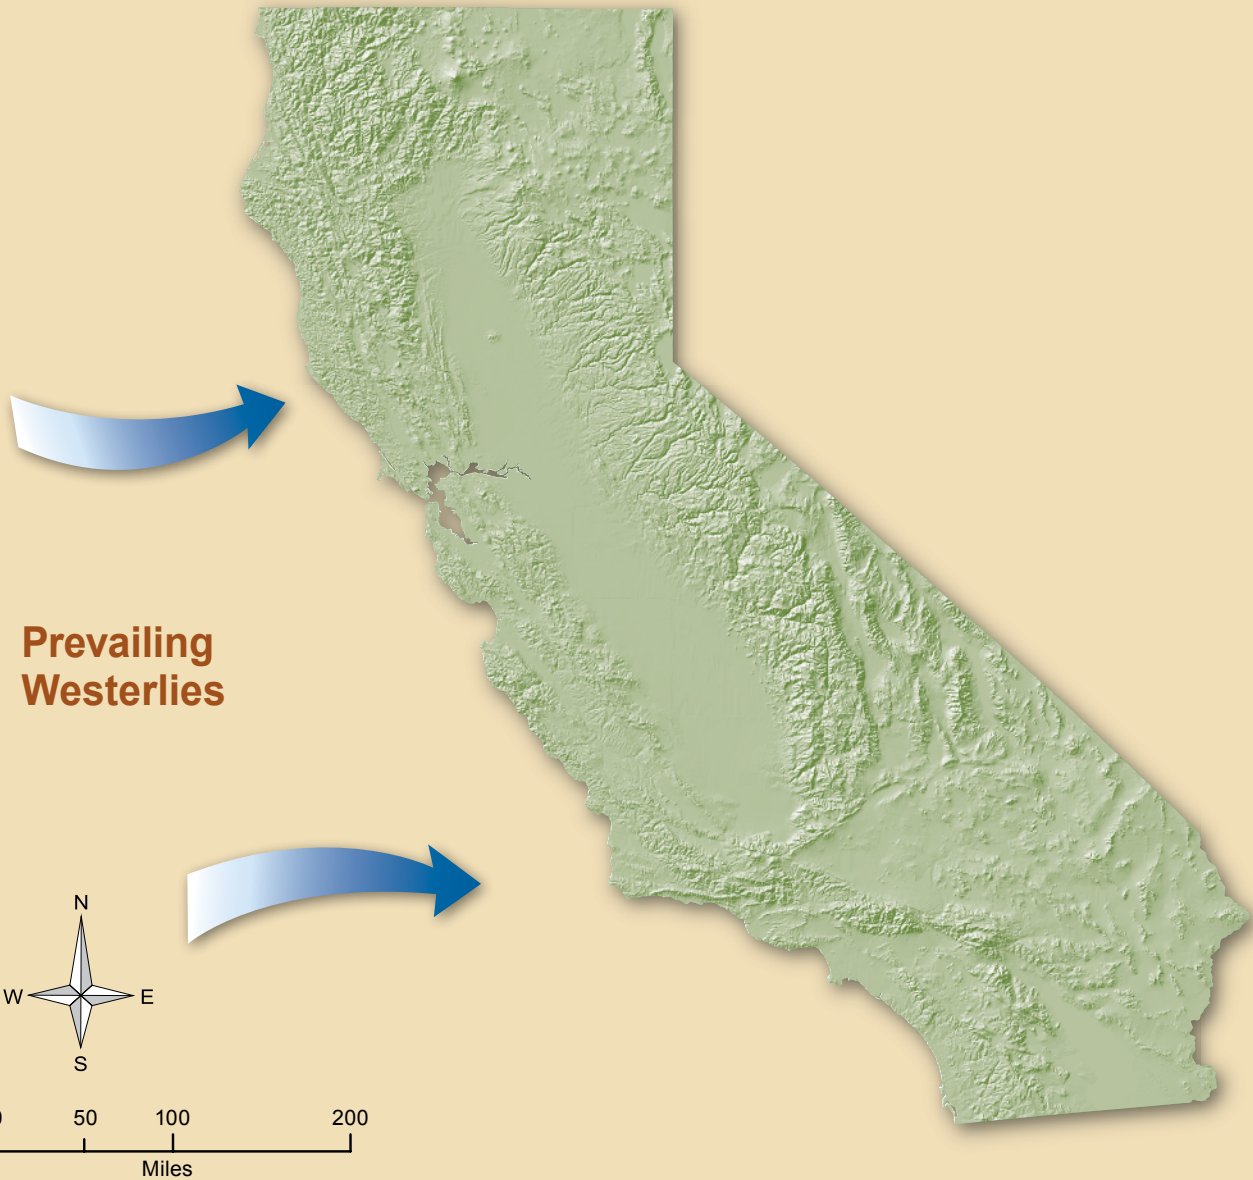

<b>10</b>	Delta Vision Recommendations . . . . .	11
<b>11</b>	California's Annual Water Budget . . . . .	12

## VA #1 Hydrologic Cycle

## VA #2 Prevailing Wind Currents

## VA #3 California's Hydrologic Regions

## VA #4 The California Aqueduct

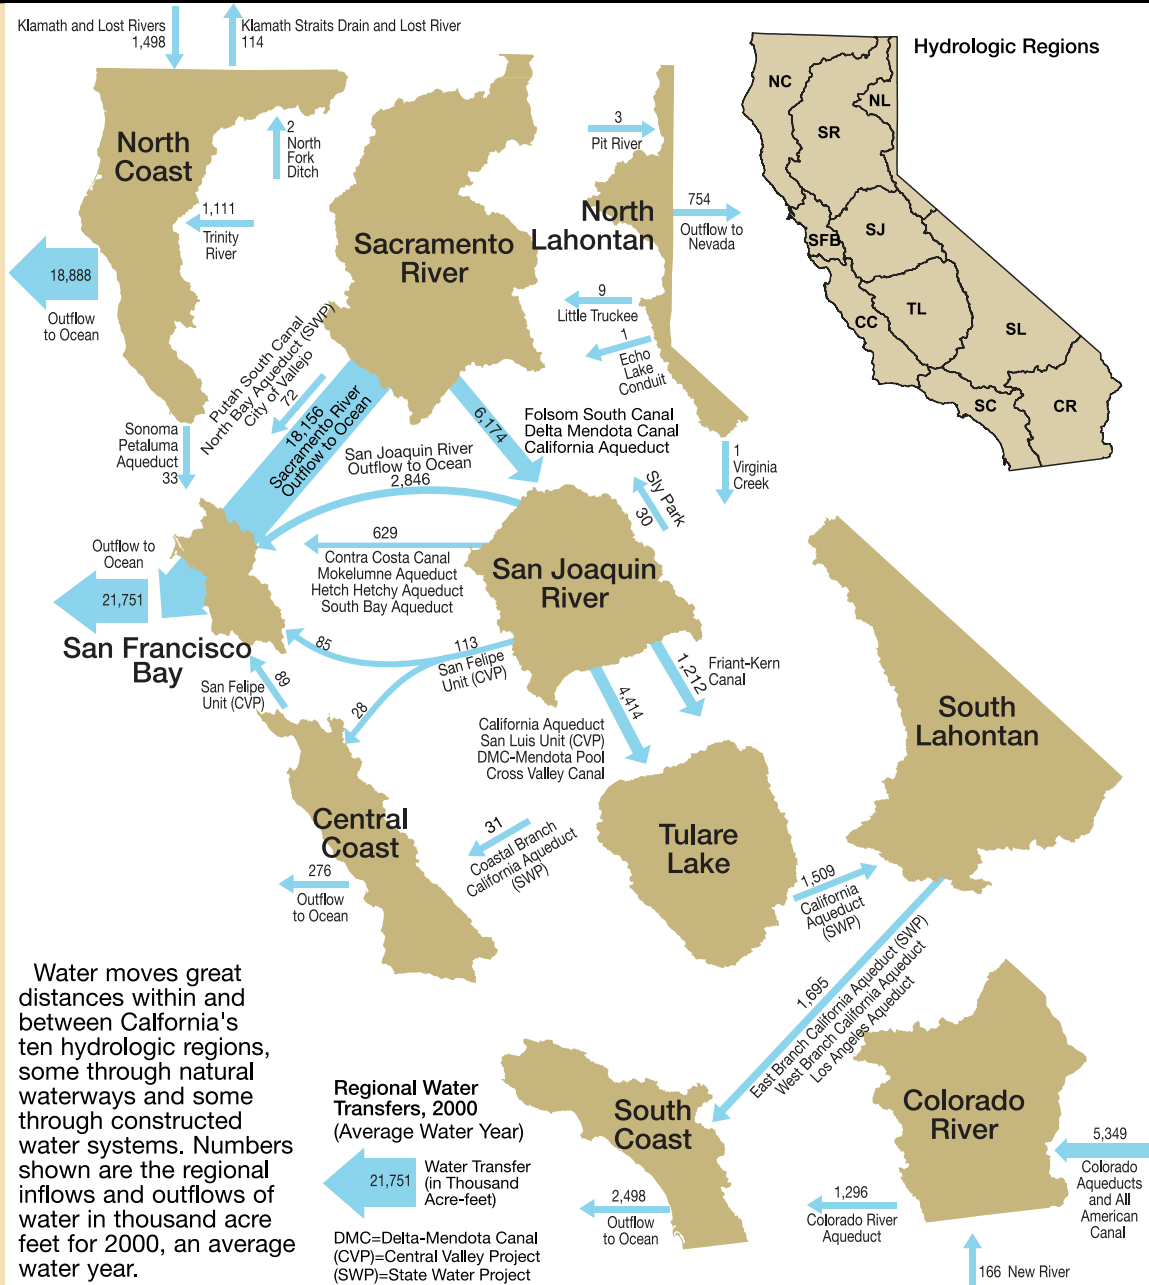

## VA #5 State Water Project

## VA #6 Regional Water Transfers

## VA #7 Central Valley Project

## VA #8 Local Water Projects

## VA #9 The Delta Smelt and Salty Lands

**Delta Smelt**

**Salty Lands**

## VA #10 Delta Vision Recommendations

**Goal 1:** Legally acknowledge the co-equal goals of restoring the Delta ecosystem and creating a more reliable water supply for California.

**Goal 2:** Recognize and enhance the unique cultural, recreational, and agricultural values of the California Delta as an evolving place, an action critical to achieving the co-equal goals.

**Goal 3:** Restore the Delta ecosystem as the heart of a healthy estuary.

**Goal 4:** Promote statewide water conservation, efficiency, and sustainable use.

**Goal 5:** Build facilities to improve the existing water conveyance system and expand statewide storage, and operate both to achieve the co-equal goals.

**Goal 6:** Reduce risks to people, property, and state interests in the Delta by effective emergency preparedness, appropriate land uses, and strategic levee investments.

**Goal 7:** Establish a new governance structure with the authority, responsibility, accountability, scientific support, and secure funding to achieve these goals.

## VA #11 California's Annual Water Budget

California's Water Budget	Quantity of Water
Precipitation and Imported Water	200 million acre-feet
Used in Evaporation/Transpiration (plants)	-130 million acre-feet
<b>Total Runoff</b>	<b>70 million acre-feet</b>
Available from Runoff	70 million acre-feet
Outflow to Pacific Ocean	-21 million acre-feet
<b>Total Runoff Stored in Reservoirs</b>	<b>49 million acre-feet</b>
<b>Stored in Reservoirs</b>	<b>49 million acre-feet</b>
Used for Agriculture	- > 20 million acre-feet
Used for Urban Purposes	- > 5 million acre-feet
Allocated to Ecosystems (Instream)	- > 25 million acre-feet

Note: By the year 2030, experts believe that California's water use will increase by 4 million acre-feet. Current precipitation amounts have remained unchanged for thousands of years. In the future, climate change may influence the amount of water produced by natural sources, and Californians should be prepared for less water from natural sources.
